TOP TREATMENTS

Alicia Osenenko Drapes & Decor

Alicia Osenenko of Rose Quartz Interiors transformed a bedroom for young twin girls with a custom balloon-style valance that feels both whimsical and sophisticated. Crafted from custom-printed fabric, the treatment echoes the room's wallpaper, creating a cohesive, storybook-inspired design. Sculpted balloon sections add softness and movement, while carefully aligned pattern placement ensures a seamless look across multiple windows. Hidden beneath the top treatment, a motorized blackout roller shade provides privacy, darkness and child-safe operation without disrupting the design. Blending imagination with technical precision, the treatment delivers a layered solution that is as functional as it is enchanting.

ALICIA OSENEKO

COMBINATION

Beverly Baribault Beverly Baribault Design Group

Working within a compact footprint, Beverly Baribault created a bedroom that feels both sophisticated and inviting. A custom upholstered headboard spans much of the wall, incorporating integrated side tables that maximize storage without sacrificing style. Custom cornice boards, roman shades and stationary panels frame picturesque lake views, while layered fabrics from Kravet, Thibaut, Brunswick & Fils and Mulberry add richness and depth. Paired with dual wallpapers and a custom bedcover that blends solids and plaids, the design brings together bold color, texture and pattern in a space that feels balanced, serene and thoughtfully composed. furnishings for a look that's cohesive, luxurious and timeless.
